## Christmas war looms!

Since the general election and the formation of the current coalition government many of us were concerned about damage to the modest recovery some had started to see! At **ProCut** we have seen an unprecedented increase in large enquiries generated by likes of the Co-Op, TESCO, Sainsbury's and Next.

Could this be in preparation for an all out Christmas high street war! And as the saying goes "make hay while the shines" before the VAT increase on January 1st 2011?

## ProCut wins major UK machining contract...

Modwood established in 1973 specialise in making cabinets for the dental industry. All units are custom built and hand finished to the surgery requirements.

**ProCut** produce the door and draw front blanks as well as the Corian work tops with splash backs and down stands.

Modwood's own specialist technicians hand finish and install "The complete package"

THE WINNER.....

In the last **ProCut** newsletter we had a competition and the answer was "A stitch in time saves 9".....And the winner is.....

Mr M Stops, from Rega Research. Details available upon request.

Did you know the first correct answer to the last newsletter was received within 35 seconds of being

**ProCut** are delighted to announce that they have been awarded the UK machining contract by Better Planet one of the UK's leading installer of under floor heating systems. ProCut's MD, Vernon Ralston, comments.....  
 "This new heating technology is amazing when you consider that some of the systems require no gas or electric boiler! Now if that doesn't prove popular nothing will !"

## 35 Tonnes of Trespa.....

### ProCut chosen by Killby & Gayford

ProCut have been awarded the cutting contract by Killby & Gayford. Killby & Gayford (a major UK construction and joinery company since 1860 based in London with offices throughout the UK) are constructing a large residential government building in London and Trespa laminate is been used to create the fittings for the 55 bedrooms.

This month's competition.

Can you identify the 7 plastic recycling symbols above

### Jargon busting corner.....

In the last edition we got as far as 1950.

The 1950's saw a major development of many plastic products, some that are still with us to day for example 1950 saw the "polyethylene bag" also the introduction of "Acrylonitrile-butadiene-styrene" (ABS)

ICI opens new factory at Redcar to produce "Terylene" 1953 saw the commercialisation of polyester fibres and introduces the concept of "drip dry" and "non-iron" 1956 Eero Saarinen's "Tulip Chair" launched, consisting of a seat made of glass-fibre-reinforced plastic and the first

sent out!!

So I hope this time you will find it a little more challenging.

See further down for this month's competition. And

**WIN.WIN.WIN**

**£50 M&S**

**Voucher.**

And finally.....

Dont forget ProCut offer the complete CNC machining service on all sheet material including;

Acrylic

MDF

Chipboard

Solid worktops
